

UNARINE MASHANDULE

CAREER OBJECTIVE

As an IT student specializing in network & security engineering, I am passionate about protecting digital systems and data against evolving threats. I aim to build a career as a cybersecurity specialist, where I can apply my knowledge of networking, operating systems, and security protocols to develop and implement effective defense strategies. My goal is to continuously advance my skills, contribute to creating safer digital environments, and become a trusted professional in the field of information security.
